EDUCATION

British Columbia Institute of Technology   **Expected April 2026**
Full-Stack Web Development   *Vancouver, BC*
Relevant Courses: Agile Software Development, Data Structures, Algorithms, Databases, Operating Systems, Object-Oriented Programming.

TECHNICAL SKILLS

Languages: JavaScript, SQL, HTML & CSS, C#, Java, Bash.
Technologies: Git, Node.js, React.js, TypeScript, Tailwind, PostgreSQL, Prisma, Express.js, Linux, Firebase Firestore, Redis.
Tools: Jira, Github, Trello, Vite, Notion, Firebase web hosting.

EXPERIENCE

Seaspan Corp   **May. 2024 - Aug. 2024**
Application Support Intern   *Vancouver, BC*
- Diagnosed and resolved application errors by analyzing system logs , error messages, and user-reported data.
- Managed user support requests via Jira Service Desk: triaged, categorized, and prioritized 100+ tickets, escalating critical issues to senior engineers and maintaining 97% SLA compliance.
- Monitored and maintained infrastructure health by conducting routine checks on servers (Windows), SQL databases, and REST APIs, ensuring 99.9% uptime for critical systems.
- Collaborated with IT teams to resolve a global CrowdStrike outage, restoring access for 1,300+ employees across 5 time zones.

Affistash | Node, Typescript, NoSQL   **March 2023 - October 2023**
Full-stack Developer   *Remote*
- Collaborated with a cross-functional team of 4 developers to design and deploy a scalable web application using Next.js (React) , and Firebase Firestore as the database.
- Engineered RESTful APIs and integrated real-time data synchronization with Firebase Authentication and Cloud Functions.
- Iteratively enhanced application performance and UX by analyzing user feedback from Indie Hackers and Twitter.

The Victor   **June 2024- Current**
Cook   *Vancouver, BC*
- Team Collaboration: Worked closely with servers, sous chefs, and managers in a dynamic team to deliver 200-400+ daily orders, aligning workflows to meet tight deadlines. (Mirrors Agile teamwork in software development).
- Thrived in high-pressure, fast-paced environments by prioritizing tasks and troubleshooting unexpected issues (e.g., equipment failures, last-minute orders), ensuring seamless service during peak hours.
- Consistently followed complex recipes with exact measurements and plating standards, minimizing errors and waste. (Analogous to writing clean, efficient code and debugging.)

PROJECTS

Jeddit | Node.js, Express.js, Bcrypt   **February 2025**
- Developed "Jeddit," a full-stack Reddit-style social media platform where users can create communities, share content, and engage through comments and voting. Implemented nested comment threads, voting systems, and community moderation features.

Devhouse| Node, Typescript, Hono, Prisma, Redis, Zod   **MARCH 2025**
- Developed a social media platform for developers to share code snippets, receive feedback, and network with peers. Users can create accounts, post code examples, and interact with other developers' content through likes and comments.
